How sustainable is the 2019 Annual Meeting of the Global Future Councils?

The World Economic Forum integrates sustainability into the organization of its meetings in line with its sustainability policy. If you have any feedback please contact sustainability@weforum.org.

To limit waste, the number of banners is reduced, and rented carpet titles are used in the Council area. The Hive’s technical flooring is made of recycled and rented materials.

All Forum staff air travel emissions are offset. Participants are invited to follow this link to offset their own travel emissions.

Locally filtered water is offered to participants and staff.

The carbon footprint of the summit is calculated and is analysed to improve sustainability performance year on year.

Menus include a choice of vegetarian options. Special attention is given to limit food waste, through specific meal formats such as standing lunches and “a la carte” menus.

Temporary structures and decor for the Plenary, the Hubs and the Council booths, and most of the furniture, are reused from past AMGFCs, to optimize materials.

Locally filtered water is offered to participants and staff.

Menus include a choice of vegetarian options. Special attention is given to limit food waste, through specific meal formats such as standing lunches and “a la carte” menus.

The venue has implemented a strategic sustainability management plan and has been awarded the Green Globe Certification. Actions taken include installation of solar panels, LED lighting and smart room management systems.
