Global Future Council on Longevity

2019-2020 Term

The World Economic Forum’s Network of Global Future Councils is the world’s foremost interdisciplinary knowledge network dedicated to promoting innovative thinking on the future. The Network provides thought leadership on key global challenges and the impact and governance of emerging technologies with representation from business, academic, public and civil society.

Mandate and Objectives

Remarkable gains in life expectancy, declines in fertility, and the progression of relatively large-sized cohorts to the older ages have led to an ageing global population. Life expectancy has increased to 70 years or more in many countries, the total fertility rates has dropped from 5 to 2.5 in the past seven decades, and it is expected that children under the age of five will be outnumbered by individuals aged 60 or more by 2020.

Population ageing brings with its opportunities and obstacles that must be understood and harnessed for actions on ageing and health.

Increasing healthy life years is a boon to human welfare. The Global Future Council on Longevity aims to inform, drive action and impact on healthy longevity by identifying and engaging stakeholders to invest in opportunities presented by healthy ageing and the pursuit of a lifespan approach to achieve it.

Workstreams:

- Raise awareness and drive action on healthy longevity on the World Economic Forum’s Agenda
- Raise awareness and drive action on healthy longevity on the global agenda
- Generate and disseminate new content and insights

Proposed Council Deliverables 2019-2020

- Social media campaign: to raise awareness and visibility on the topic of healthy ageing and longevity
- Agenda setting: raising healthy ageing and longevity at global events and milestones
- Webinars: to disseminate knowledge on topics on healthy ageing and longevity
Council outputs 2019/2020 term:

Community Paper: COVID and Longer Lives: Combating ageism and creating solutions

COVID and Ageing Society Virtual Dialogue Series: 30 June to 28 July 2020

The Global Future Council on Longevity in collaboration with AARP and the National Academy of Medicine, USA, hosted a five-part dialogue series on COVID and Ageing Society to provide perspective on and outline implications of the coronavirus disease (COVID-19) pandemic on older adults. It brought together stakeholders from government, academia, civil society and the private sector to consider emerging imperatives and opportunities for action on ageing and health.

Video Highlights

- Part 1: Long-term care facilities
- Part 2: Home and community-based care
- Part 3: Ageism in the of coronavirus
- Part 4: Impact on older adults in low-and-middle income countries
- Part 5: Converging pandemics: Loneliness and Isolation
